

WC7600 Bundle SKU  
WC7660SKT  
License Activation

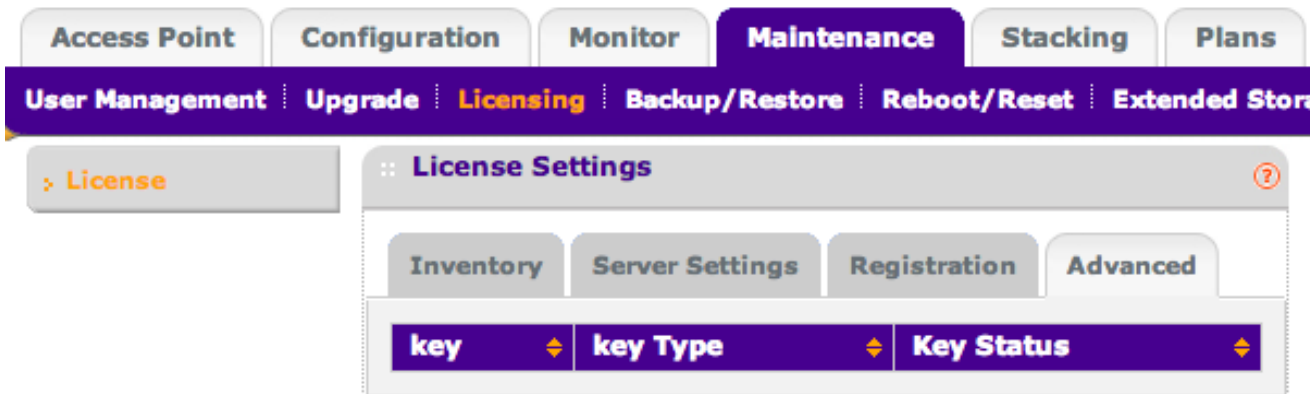

William Stanislaus

# Introduction

- WC7600 bundle SKU provides the capability to add one WC7600 and 10 WNDAP660 AP's in one single package and ship to a customer.
- Bundle SKU also pre-provision the 10 AP (WC10APL-10000S) license in the wireless controller.

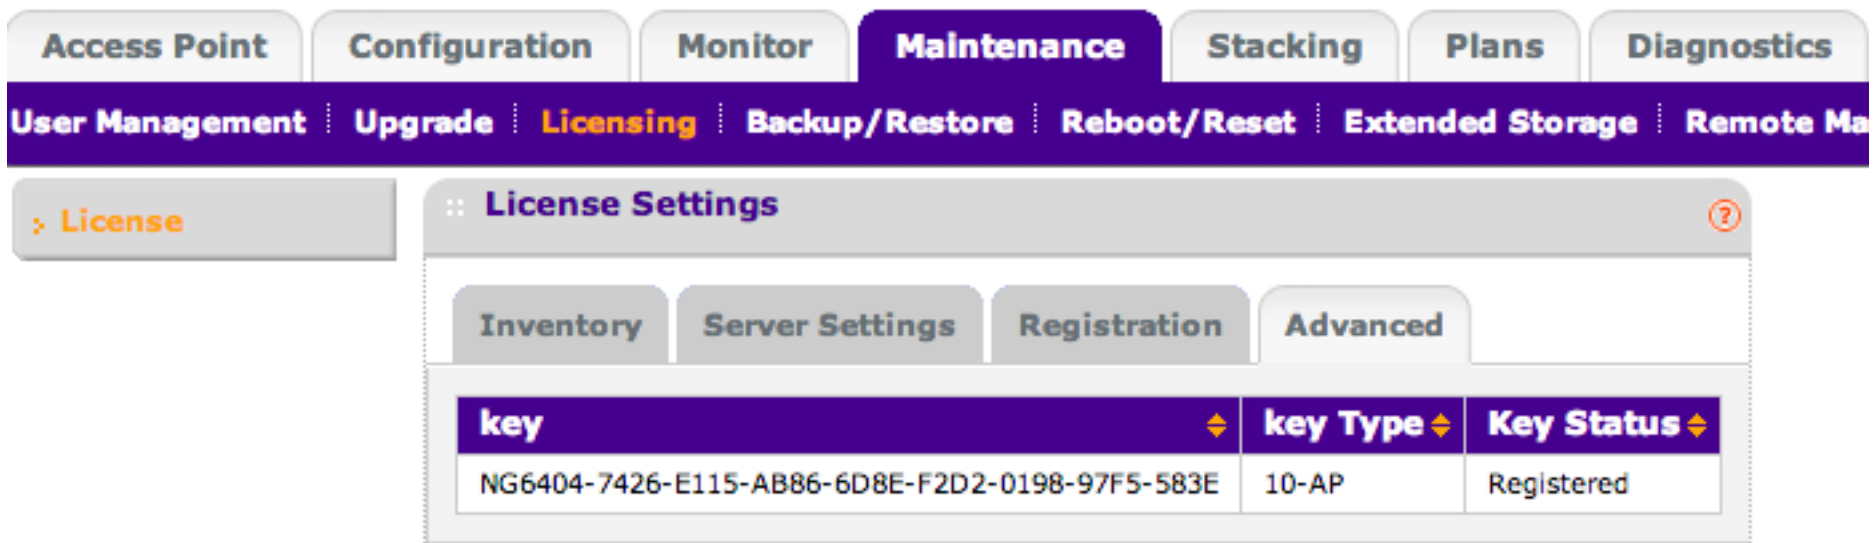

# End customer retrieval of electronic license

- + Customer receive the wireless controller bundle.
- + Unpack wireless controller and connect to the wired network.
- + Configure the wireless controller IP address, gateway and DNS server configurations.
- + Make sure DNS works.
- + Go to Maintenance -> Licensing -> Advanced

# Cont...

- + Click the “Replace” button on the right bottom.
- + Now the wireless controller should reach the license management server (LMS) and retrieve the electronic license already assigned to this wireless controller serial number.

The screenshot shows the Netgear web interface with the 'Maintenance' tab selected. Under 'Maintenance', the 'Licensing' sub-tab is active. The 'License Settings' page is displayed, showing a table with license information.
