

Sales Circular No. 09/FY 2005

Sales Release for HiPath Cordless Enterprise / Office base station 4

As of 29th October 2004, the HiPath Cordless Enterprise / Office base station 4 is released for sale through direct and indirect sales channels, in all countries which sell HiPath Cordless and which meets the conditions listed below.

General release (M3) was also on 29th October 2004.

Base station 4 in its function as universal radio transmitter is a component for both HiPath Cordless Enterprise and HiPath Cordless Office. Base station 4 replaces all base station 3 variants (BS3/3, BS3/1, BS3/S).

Phase-out of base station 3 variants will be released separately.

This ensures optimum scalability of HiPath Cordless solutions on HiPath 4000 and HiPath 3000. With HiPath 3000, base station 4 allows performance-oriented marketing by licenses for individual speech channels.

Conditions:

- HiPath Cordless Enterprise; Connection of the BS 4 via SLC24 only.
- HiPath Cordless Office; Connection earliest with HiPath 3000 V5.0 via SLC 16N, SLCN or via direct connection (UP0 of motherboard). The release of HiPath 3000 V5.0 will be announced separately.

The complete sales release consists of the following documents,:

- this sales circular
- Sales Information Target Group: Sales and Consulting
- Technical Information Target Group: Projecting and Technical Sales
- Service Guideline Target Group: Service
