About Us

YEAR ANNIVERSARY

Who are we?

We are an industry-leading manufacturer of SIP devices. Originated in France, the company prides itself in a history of over a century of dedication and expertise in communication technologies. Our products are widely applied in the education, government, healthcare, hospitality and transportation sectors.

The company has been placing the focus in recent years on innovative technologies to develop a wide-range of SIP-based products that can be integrated into a variety of solutions with easy provisioning tools in a cost effective, secure and flexible manner. We are the audio technology expert in the global market of desk phones that provide best performance on narrowband, wideband and super wideband audio.

Equipped with cutting-edge technologies and backed by the century-long heritage of expertise in the industry, we will provide better service to our customers and help them grow their businesses.

Myriad Series
SIP Deskphone

Market Positioning:

· Enterprise-grade mid-to-high range desktop phones
· 3 models line-up, supporting up to 8 line keys
· Cost-effective B/W display deskphone - M3
· Experience-oriented color display deskphone - M5 and M7

Feature Highlights:

· Elegant industrial design inspired by the Effiel Tower with an intuitive UI and larger display
· Built with SWB technology with enhancements on the audio components and chamber design
· Robust telephony features for greater call management efficiency
· Dual USB port supporting Audio Hub and external devices connectivity

Business Applications:

· C-level executives, managers, professionals and reception desks
· Huddle room for 3-5 people audio conferencing
· Vertical markets with demand of stable HD audio and operational flexibility

M3

M7

M5

· 2.8/3.5-inch color or B/W display with backlit
· 8 SIP accounts, up to 28 programmable keys
· 4 menu keys
· Fixed keys for common functions
· Integrated PoE, dual GbE
· Integrated dual USB port (A/C)
· Support expansion module(EM20/EM200)
· 5-party local conferencing
· M7 supports Bluetooth

· HD handset
· Full-duplex hands-free
· RJ9 headset
· PoE Class 1
· Dual GigE port (8008G CE)
· Dual 10/100M Ethernet port (8008s CE)

8018s CE

· 2.4" B/W backlit display
· 2 SIP accounts
· HD handset
· Full-duplex hands-free
· USB headset
· PoE Class 1
· Dual GigE port
· Support Wi-Fi dongle

8068s CE/8058 CE

· 3.5" color display
· HD handset
· SWB for hands-free
· Support Bluetooth handset (8068s)
· Support USB/3.5mm headset
· Support Wi-Fi dongle
· PoE Class 2
· Dual GigE port
· Adjustable metallic foot stand
· IPSEC VPN/Open VPN

8078s CE

· 5" color touch screen
· HD handset
· SWB for hands-free
· Support Bluetooth handset
· Support USB/3.5mm headset
· Support Wi-Fi dongle
· PoE Class 2
· Dual GigE port
· Adjustable metallic foot stand
· IPSEC VPN/Open VPN

Aries 10 Series Business Headset

Market Positioning:

- 6 models line-up, affordable prices with high performance
- RJ9 and USB-A port options for different device intefaces

Feature Highlights:

- High quality speaker, HD audio quality
- 330° adjustable microphone
- Ultra lightweight design, monaural 44g, binaural 62g
- Larger ear cushion, soft and comfort wearing

PC, Softphone

USB deskphone

Business Applications:

Call centers, financial services, online education, business offices
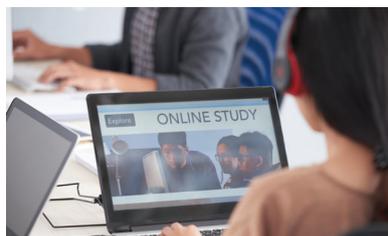

Easy Device Deployment

Easy Deployment Server

ALE's Easy Deployment Server(EDS) offers our business partners and end-user customers a cloud based, efficient and easy-to-use device redirection service.

The EDS allows zero touch configuration of ALE SIP devices for the end user. Upon initial boot-up, registered ALE SIP devices will collect its configuration file automatically without any specific configuration for the end user on the phone or network infrastructure level.

"Zero-Touch", Massive Deployment

Automatic connection and redirection

Redirection setting via WBM and API

Free service, saving cost

Global access, remote configuration

HTTPS encryption and security certificates for authentication

Level-to-level management
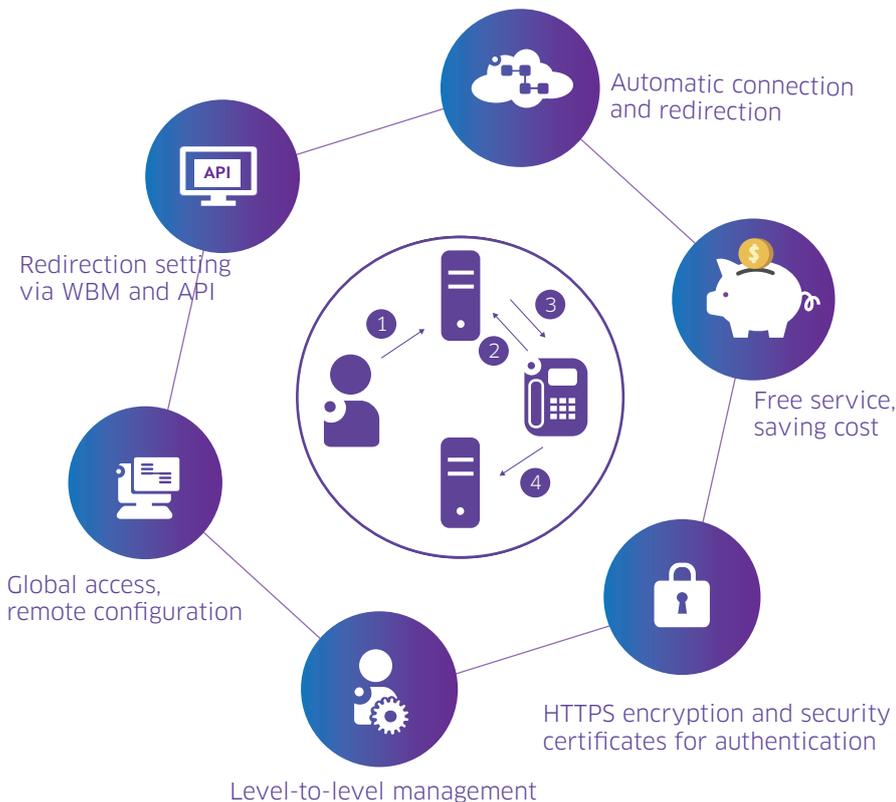

Benefits

VADs & Service Providers
- Global access, remote configuration
- No additional network layer settings
- Secure solution with HTTPS & certificates
- Reducing deployment time and cost

End User Customers
- Auto redirection, saving development cost
- No additional customer action
- Realizes "plug-and-play"

To register an EDS account, visit

Easy Device Provisioning

Easy Provisioning Server

ALE's Easy Provisioning Server(EPS) provides efficient device provisioning using an intuitive graphic interface. Customers can import device list or actively scan ALE devices as to complete the configuration efficiently.

Through custom configuration customers can conduct operations such as remote device reboot and upgrade.

Feature Highlights:

· Lightweight software, one-click startup
· Supports Windows and Linux OS
· Active device scanning
· Auto device provisioning and upgrade
· Supports batch provisioning and custom grouping for customization
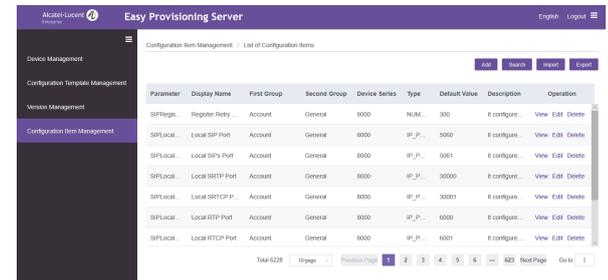

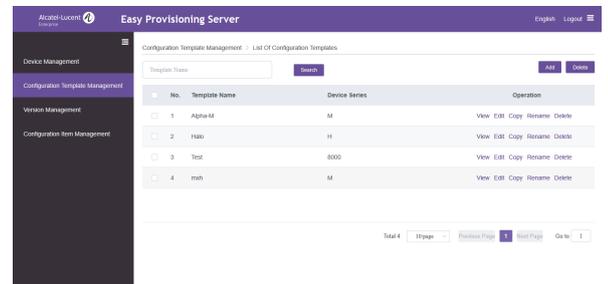

Visualized Provisioning, "Plug-and-Play"

Easy to Use
Easy installation,
One-click startup

Active Scan
Easy device searching,
proactively add the device

Robust Features
Supports custom grouping, auto
upgrade for different scenarios

Customized Management
Flexible global/customized
configuration

Remote Upgrade
Easy device upgrade at
anytime and anywhere

Free of Cost
Saving time and cost
